Objective

Software Developer with strong knowledge of JavaScript, Python, and Java, and hands-on experience in building responsive web applications using React.js. Skilled in writing clean, efficient code and implementing user-focused interfaces. Strong foundation in data structures, problem-solving, and software development principles. Seeking an entry-level Software Developer role to contribute to scalable and user-centric applications.

Skills

Programming Languages: Python, C, Java, JavaScript.

Web Technologies: ReactJS, HTML, CSS.

Core Concepts: Data Structures and Algorithms, OOPS, DBMS, Problem Solving.

Tools: Git, GitHub, VS Code, Postman

Operating Systems: Linux, Windows

Projects

Personal Cv live

- Created a personal CV website with a responsive design to showcase my skills, experience, and education. Implemented interactive sections for easy navigation and optimized for accessibility across devices.
- Tools Used: React, JavaScript, Html, CSS.

Temporary Chat Without Login live

- Developed a browser-based real-time chat application enabling users to communicate instantly without login or registration and also Implemented WebSocket-based communication for low-latency message delivery.
- Designed a simple and intuitive UI for seamless user interaction and Enhanced functionality by introducing room-based chat with unique Room IDs for private group communication.
- Tools used: C, Arduino IDE, TinkerCard

CLASS ARCHIVE - A Digital Storage Solution for Classrooms live

- Class Archive is a centralized platform for educational institutions to efficiently distribute lecture materials and announcements. Lecturers can upload and organize notes for ensuring easy access for students. The Admin Panel streamlines content management with Create, Read, and Granular Role.
- A responsive web application using React.js for managing and accessing classroom resources and Integrated frontend with backend services for data handling and authentication.
- Tools used: Node.js with Express.js, React.js, JavaScript, HTML,CSS.

Education

Mallareddy College of Engineering and Technology, Internet Of Things	2022 – 2026
• CGPA: 7.58	
Akshara Junior College, Intermediate	2020 – 2022
• CGPA: 7.13	
Chaitanya Bharathi High School, SSC	2019 – 2020
• CGPA: 10	

Certificates

- Python for Beginners
- Introduction to Artificial Intelligence (AI)
- Introduction to HTML5
- Scaler Moonshot Program
- Deloitte Job Simulation - Cybersecurity Analyst
